

JOURNAL ENTRY #16 ASSIGNMENT

PROJECT #2 REVISION PLAN

Reread your Project #2 Draft A and the responses from your peer. Answer the questions below.

1. **Explain / summarize the feedback you received on your Project #2 Draft A.** What did your peer(s) think you were doing well? What did your peer(s) think you should revise? Was any of this feedback contradictory? If so, how?

Feedback was not provided; however, if I were to criticize my own work is that the draft did not look like it was completed – Matt be sure to have draft be in a more complete state than where draft A stands now.

2. **Critique the feedback you have received.** What feedback was helpful for you as an author? Why? What wasn't helpful for you as an author? Why? What feedback will you use and what feedback will you ignore?

I have all the information I just need to provide them on the slides. I'm not very artistic and can make pretty power point slides, so I'll stick to the standard template and layout to make sure graphics does not make the information, the thing that matters, hidden and hard to read.

3. **Develop and explain a specific plan you will follow as you work on your next draft.** Write down at least two specific and concrete revisions you plan on making in editing and revising your Draft A.
 1. Have draft-B in a acceptable complete and finished state.
 2. Because I don't have fancy art skills focused on making the content clean and easy to read.
